Wendy R., Meaningful Use Account Manager for UroChart EHR at HealthTronics, Inc.
Springfield, Missouri Area

I would highly recommend the CHPSE - HIPAA Privacy and Security Expert course to any professional who is looking for certification in this area. Bob Mehta and the staff of The Supremas Group were great to work with and made it very convenient to work into a busy schedule. You should consider this course if you are looking for HIPAA Compliance certification.

I recently completed the Certified HIPAA Privacy and Security Training with your company. It was very convenient for me because it allowed me to complete it as I had time. It was very informative. As a new Compliance Officer starting up our compliance department I gained a wealth of knowledge. I would recommend this training to anyone wanting to be fully trained on all aspects of Privacy and Security.

Racquel (Quelly) S., Director of HR / Talent Acquisition at Xact Data Discovery
Kansas City, Missouri Area

I just recently completed the HIPAA Privacy and Security Expert Course on line. It was comprehensive and informational, clearly defining the responsibilities of a Privacy and Security officer in any organization to be truly compliant with HIPAA requirements. The site administrators are helpful and quick to respond to my inquiries. The lessons simplified the purpose of the law to protect the privacy and confidentiality of a patient's identifiable health information in any form.

The CHPSE exam is a great option for healthcare privacy and compliance professionals that require detailed knowledge of HIPAA and its regulatory requirements. I found the CHPSE course and exam to be very comprehensive and provided me with a solid background and understanding of the material. I would highly recommend to anyone who is working in a position that requires them to have a detailed expert level knowledge of HIPAA.

I recommend the Supremus Group's Certified HIPAA Privacy and Security Course to anyone looking to enhance their individual or collective knowledge in the all areas of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). I have been working with HIPAA rules since 2004 while serving in the US Army and was excited to find an in the classroom course to get certified as well as in classroom instruction. Most courses like this only provide online instruction. While I was not looking forward to the power point by death presentation I was especially happy with the teacher student interaction. The class I attended was very interactive and everyone was open to sharing their experiences/knowledge with HIPAA. The books and materials given for home use where very helpful as reference materials and the certification practice test and test were very easy to follow, although very long, so make sure you have appropriate time. Lastly, the instructor's (Ross Leo) ability to connect with his students and his talent at teaching simple concepts, as well as more advanced topics, were both very helpful to new and old students of HIPAA. He had good verbal communication skills, was extremely organized, reliable and computer literate. I would recommend Supremus Group to anyone without reservation. Thanks

Jake S., Head Swim Coach at Round Hill Country Club
San Francisco Bay Area

I highly recommend the CHPSE course, being able to train online with my busy schedule was pretty much the only way I was going to get it done. The information was very detailed and gave me an extensive knowledge base to be successful. Even though there is a tremendous amount of information - the course makes it easy to understand and take in. The staff was exceptional and really made the process easy for me. I am very happy to have found the Supremus Group and would recommend them to anyone.

Racquel (Quelly) S., Director of HR / Talent Acquisition at Xact Data Discovery
Kansas City, Missouri Area

I just recently completed the HIPAA Privacy and Security Expert Course on line. It was comprehensive and informational, clearly defining the responsibilities of a Privacy and Security officer in any organization to be truly compliant with HIPAA requirements. The site administrators are helpful and quick to respond to my inquiries. The lessons simplified the purpose of the law to protect the privacy and confidentiality of a patient's identifiable health information in any form.

Susan N., Management Analyst at Department of Veterans Affairs
Greater Salt Lake City Area

I would personally recommend this training and certification for anyone who needs to understand HIPAA privacy and security. I attended remotely and found it to be right on target.

Ross A. L., Associate Director, Training and Professional Development at University of Houston Clear Lake
Houston, Texas Area

I recommend the CHPSE training and certification very highly. The training itself provides an excellent foundation in HIPAA and its requirements. The certification requires not only the training but experience to pass. The combination is unparalleled in demonstrating the CHPSE holder is a qualified and knowledgeable professional. Given the option, I would very likely to select a holder of the CHPSE over a non-holder because I know what it takes to attain it. It makes the difference.

Tim G., Privacy Officer at State of Arizona
Phoenix, Arizona Area

I signed up for the four day Certified HIPAA Privacy Security Expert (CHPSE) Certification onsite class in Phoenix, AZ, and they had to cancel the class due an unfortunate circumstance. In order not to inconvenience me they set me up with a knowledgeable and experienced instructor to proctor an online training. The books and materials given for home were very helpful in getting through the course. The instructor was outstanding & used real life scenarios incorporated with his knowledge of HIPAA, which made the experience very enjoyable. They have been very supportive in helping me along the way to my certification. I would recommend taking the CHPSE course Online to anyone interested in any of the HIPAA Certifications.

I recommend the CHPSE training. They had flexible training schedules and when I signed up for the 3 day onsite class in Phoenix, AZ and they had to cancel the class they worked with me to upgrade to an online instructor lead course. They have been a great support system while I worked to get certified. With this CHPSE certificate, I hope to widen my scope of opportunities as a business analyst.

Stephanie S., Health Information Manager at First Choice Health Centers Inc.
Hartford, Connecticut Area

I had to take the CHPSE training course for a Medical Records position at my current job, I think this course had a lot of information regarding maintaining compliance, protection, security, and privacy of protected health information. I think this course would help anyone trying to gain knowledge of all the aspects that HIPAA covers.

Kirk C., Council Member Ward 1 at City of Lamar, CO
Colorado Springs, Colorado Area

The Supremus Group's HIPAA Privacy Security Expert (CHPSE) program was a very challenging experience. The training programs provided covered the full spectrum of knowledge necessary for HIPAA Compliance. As a Security and Network Architecture Consultant, the program challenged my skills and allowed me to attain a certification that will allow me to provide a higher quality of service to my clients and it gives a professional certification to show my mutual investment as a Business Associate.

Christine S., Government Affairs Specialist at SRSsoft
Greater New York City Area

I just finished my CHPSE online course and highly recommended this certification to other Compliance, Security or Privacy Officials looking for more in depth knowledge of the HIPAA, HITECH and Red Flag legislations. I thought my HIPAA knowledge was already solid but this course gave me much more insight into the standards and requirements.

STEVEN M., Patient Administrator at US Army
Augusta, Georgia Area

I recommend the Supremus Group's Certified HIPAA Privacy and Security Course to anyone looking to enhance their individual or collective knowledge in the all areas of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). I have been working with HIPAA rules since 2004 while serving in the US Army and was excited to find an in the classroom course to get certified as well as in classroom instruction. Most courses like this only provide online instruction. While I was not looking forward to the power point by death presentation I was especially happy with the teacher student interaction. The class I attended was very interactive and everyone was open to sharing their experiences/knowledge with HIPAA. The books and materials given for home

Most courses like this only provide online instruction. While I was not looking forward to the power point by death presentation I was especially happy with the teacher student interaction. The class I attended was very interactive and everyone was open to sharing their experiences/knowledge with HIPAA. The books and materials given for home use where very helpful as reference materials and the certification practice test and test were very easy to follow, although very long, so make sure you have appropriate time. Lastly, the instructor's (Ross Leo) ability to connect with his students and his talent at teaching simple concepts, as well as more advanced topics, were both very helpful to new and old students of HIPAA. He had good verbal communication skills, was extremely organized, reliable and computer literate. I would recommend Supremus Group to anyone without reservation. Thanks

I just recently completed the HIPAA Privacy and Security Expert Course on line. It was comprehensive and informational, clearly defining the responsibilities of a Privacy and Security officer in any organization to be truly compliant with HIPAA requirements. The site administrators are helpful and quick to respond to my inquiries. The lessons simplified the purpose of the law to protect the privacy and confidentiality of a patient's identifiable health information in any form.

Take this HIPAA training to get in depth knowledge to manage compliance, protection of privacy and security of confidential information. Its important to embed HIPAA guidelines by ALL health service providers and IT enabling services solutions for the health industry in US for the US markets. CHPSE, who are experts in the field can provide the required support and assistance to achieve the goals.
